

NEMO initiative: Survey of HRTF Dataset Use in Academia and Industry

Katharina Pollack¹, Fabian Brinkmann², Pedro Lladó³, and Nils Meyer-Kahlen^{4,5}

¹*Acoustics Research Institute, Austrian Academy of Sciences*

²*Audio Communication Group, Technische Universität Berlin*

³*Institute of Sound Recording, Department of Music and Media, University of Surrey*

⁴*Dyson School of Design Engineering, Imperial College, London, UK*

⁵*Dpt. of Information and Communications Engineering, Aalto University, Espoo, Finland*

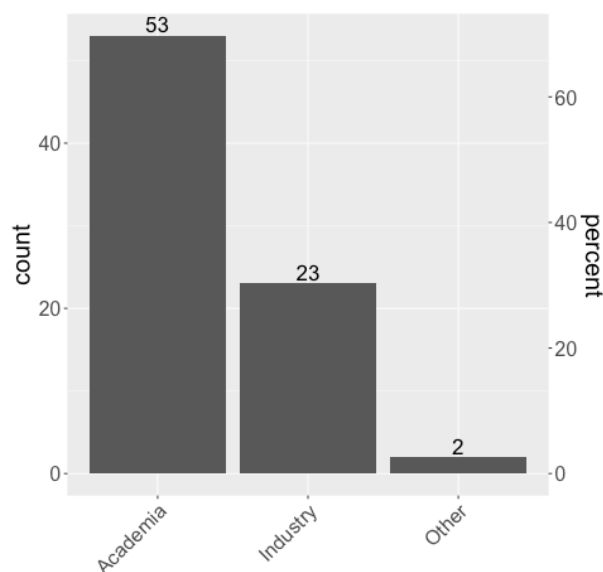

Survey Information

The survey was conducted between 22nd September 2025 and 11th February 2026 and was completed by 76 participants. For more information please refer to

Pollack, K, Brinkmann, F, Lladó, P, and Meyer-Kahlen, N. 'A survey of HRTF dataset use in academia and industry reveals no de facto standard.' *AES Int. Conv. Audio for Virtual and Augmented Reality and Immersive Games (AVARIG)*, Paris, France, 2026.

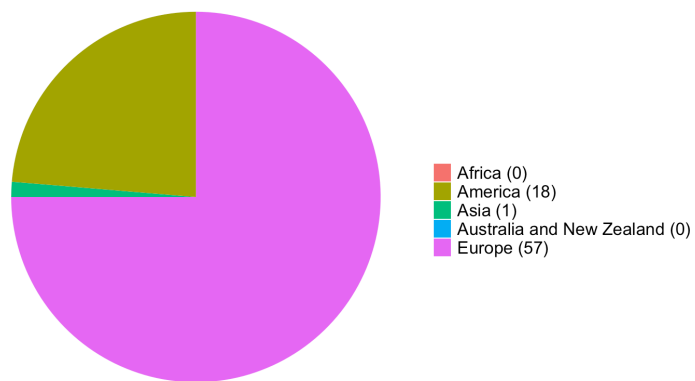

Background

Question 1: What is your profession?

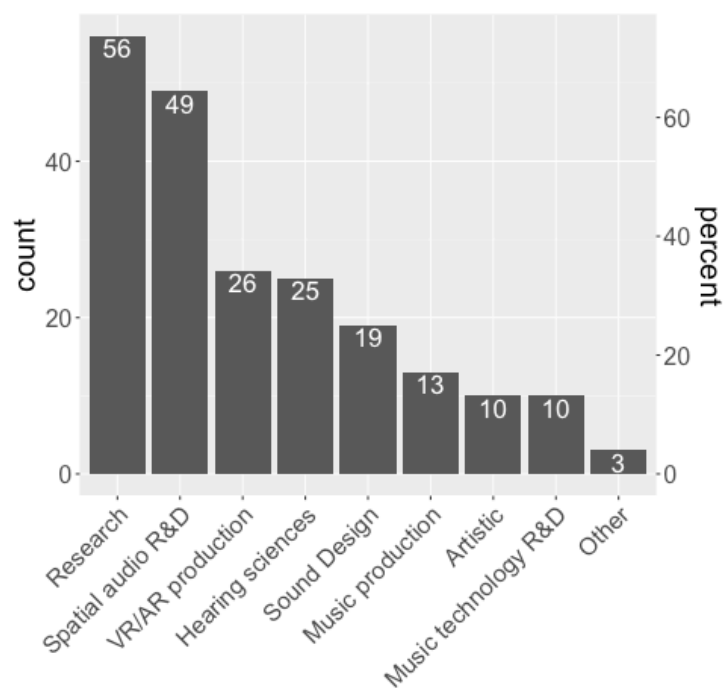

Multiple selections allowed.

Question 2: Where are you based?

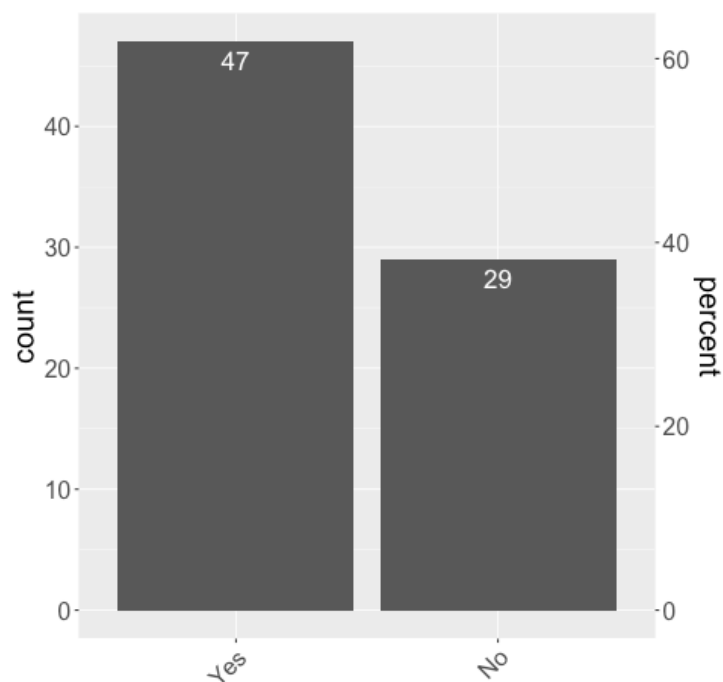

Question 4: In which context do you use HRTFs

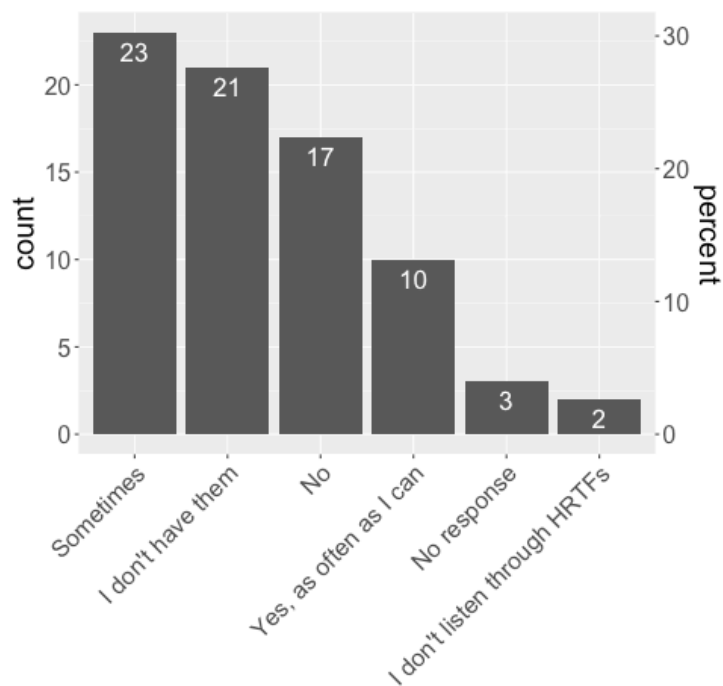

Multiple selections allowed.

Individual HRTFs

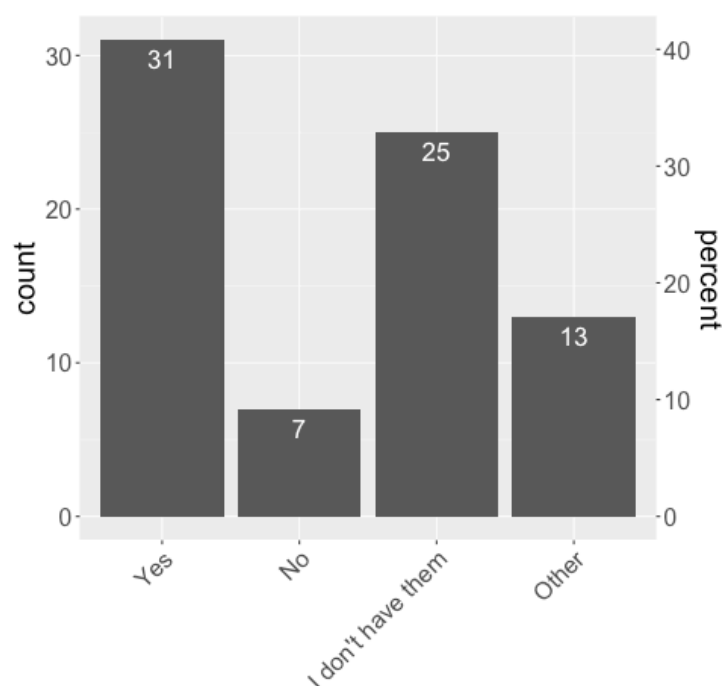

Question 5: Do you have your own HRTF measured? (using loudspeakers in a professional acoustic facility)

Question 6: When you listen through HRTFs, do you use your individual set?

Question 7: Do you like your individual HRTFs?

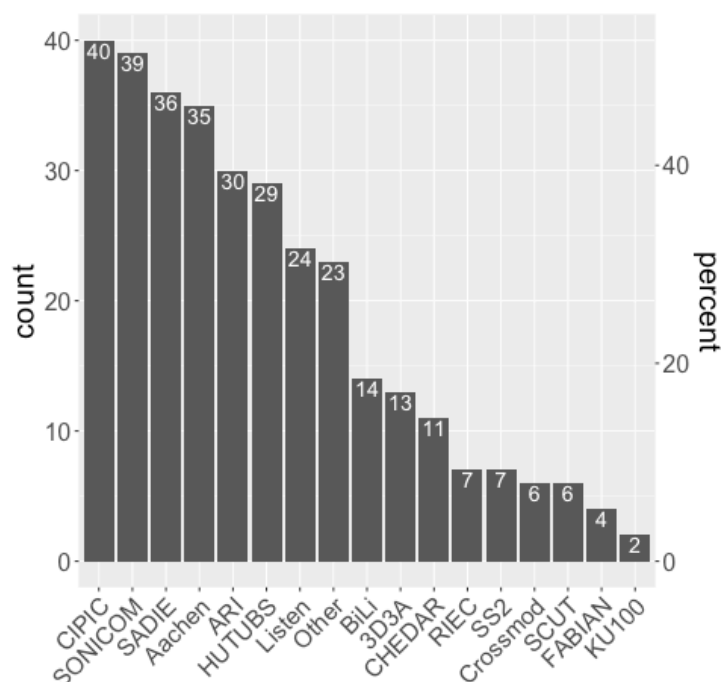

Question 8: What criteria do you follow when selecting an HRTF set?

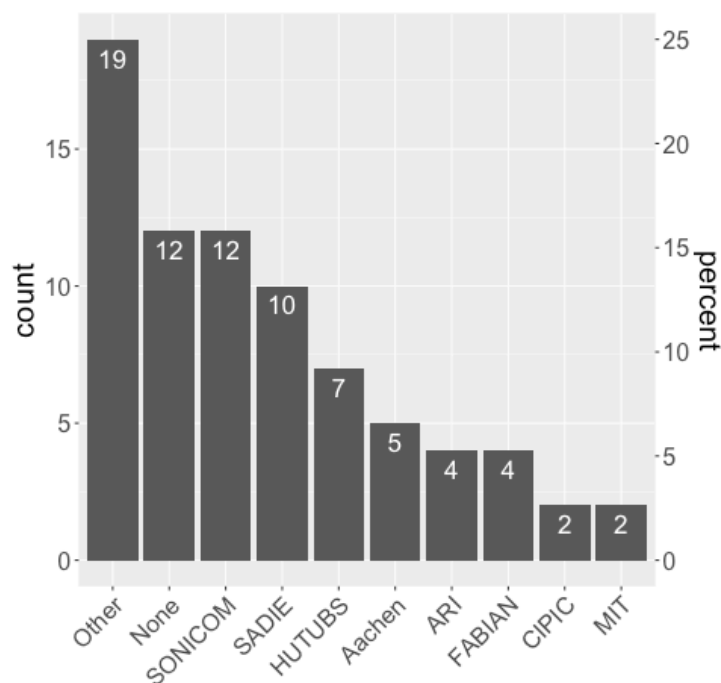

Wordcloud generated from free text responses

Question 9: Which HRTF database(s) are you familiar with?

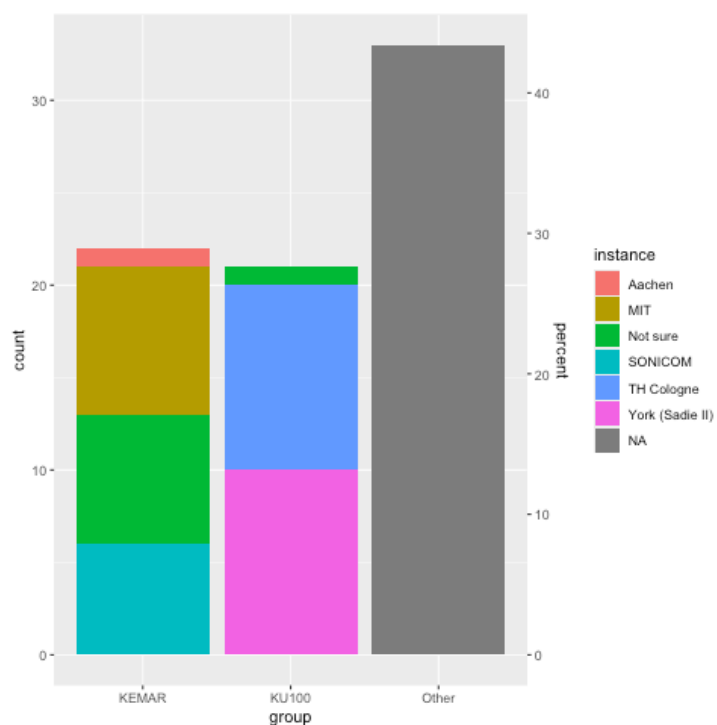

Multiple selections allowed. Single mentions collapsed in *Other* category.

Question 10: Which HRTF database do you currently use the most?

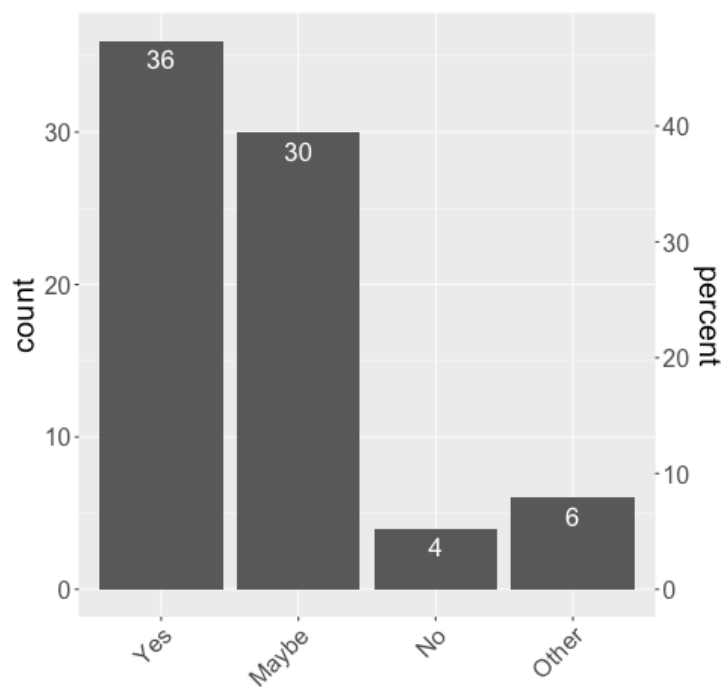

Multiple selections allowed. Single mentions collapsed in *Other* category.

Question 12: Which specific HRTF set do you use the most?

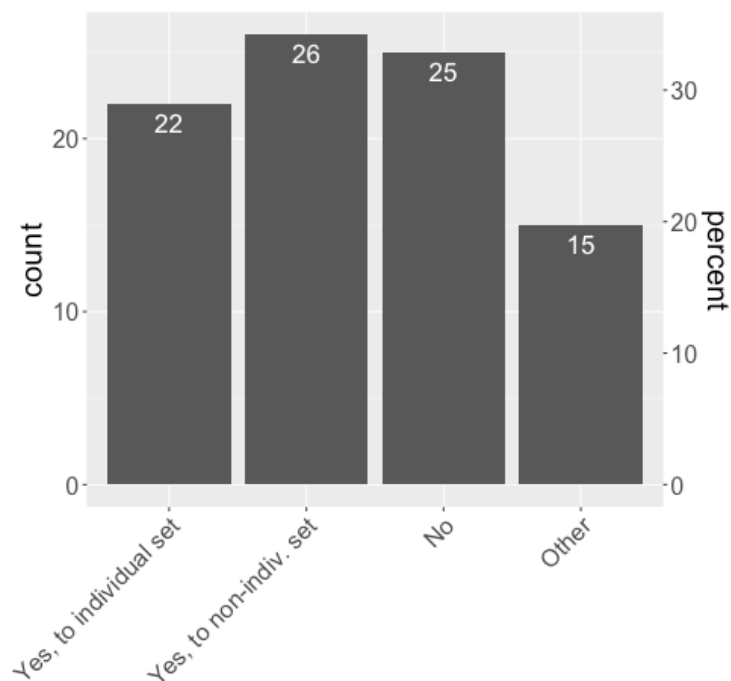

Less frequent mentions collapsed in *Other* category.

Question 14: Would you use a different set of HRTFs as default if it was used across applications and research labs? In other words, would you use the outcome of the NEMO initiative?

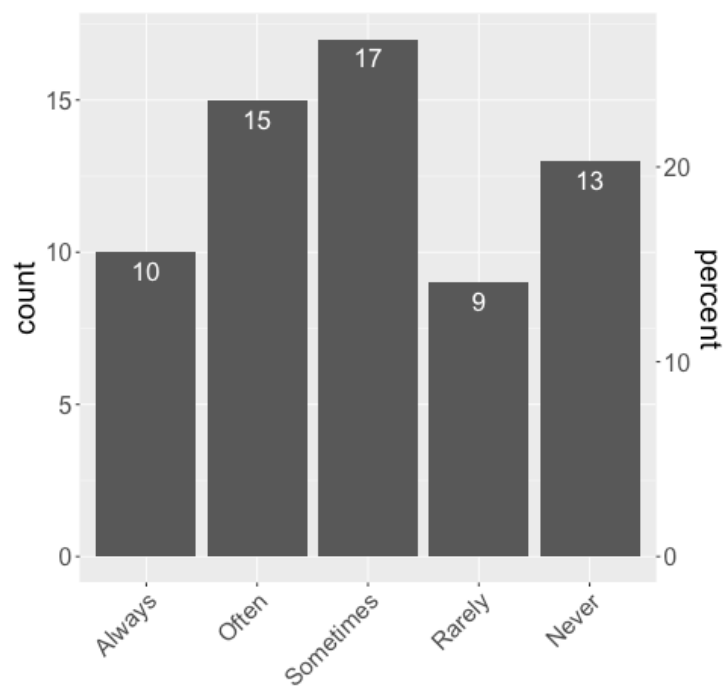

Question 18: In these applications, do you change the HRTF set if possible?

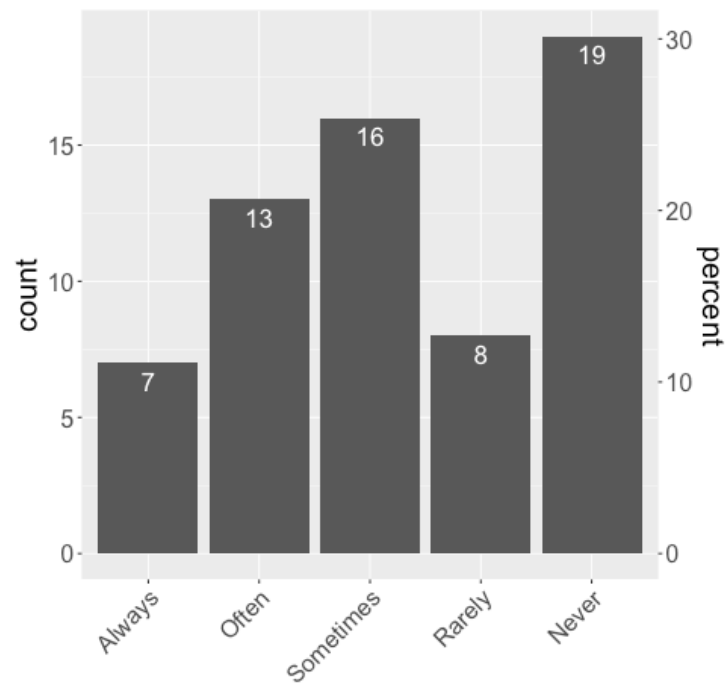

Multiple mentions possible. Free-text responses collapsed in *Other* category.

Question 19: When you use binaural rendering, how often does it involve head-tracking?

Question added after 12 participants and percentages adjusted accordingly.

Question 21: When you use binaural rendering, how often does it involve individual headphone equalization?

Question added after 12 participants and percentages adjusted accordingly.
